DAVID NOVAK

SKILLS

A budding, passionate frontend developer with a keen interest in UI/UX implementations. Experience with HTML, Pug, Sass, CSS Grid, Bulma, Bootstrap, Materialize, JavaScript, React, JQuery, NodeJS, Firebase, Mongo, MySQL, Neat, Bourbon, Gulp, Heroku and prototyping tools such as Figma and Adobe XD.

EXPERIENCE

Social Media Strategist – *Batteries Direct, 2015–2017*

- Focus on growing online presence of small businesses through various social media platforms.
- Research and write relevant material to maximize outreach and interaction with new potential partners and loyal audience.
- Develop, analyze and advise on digital trends to implement an effective strategy towards target market.

CASE STUDIES

Let's Find – *<https://lets-find.herokuapp.com/>*

- Community driven lost and found web app.
- Implements Google Maps API, CSS Grid, & MVC file structure.
- Deployed to Heroku with MySQL database add-on.

Friend Finder – *<https://friend-finder-dave.herokuapp.com>*

- Developed with Pug, Sass, and Skeleton CSS Framework.
- Matches answers with a new best friend database (MySQL).
- Dynamically changes page in real-time with user input.

Giftastic – *<https://github.com/novakdr/giftastic>*

- Gif display app that takes and manipulates user input.
- Built using the Bootstrap framework.
- Uses Giphy API to fetch and display user selections and additions.
